

Udderly ridiculous—and that’s no bull...!

What the horse...?

There is a shortage of calf replacement formula...! *How ever* are we supposed to feed our babies? Do they think we flow with milk...! These udders are just something to make bras tantalizing so that the bulls follow us all around like love-struck puppies...! They have no practical use...! Do they...? Hmmm.... nawww... can't be. It's a good thing that Bill Gates has a crystal ball and must have had a "premonition" (or is that "pre-money-itchn'"); and hopefully, his GMO baby formula will have the monkey pox and covid DNA altering experimental drug in it so babies can receive all that poison naturally the way that God intended...! It's a good thing we are feminists and have all this "empowerment" or we might feel stupid and helpless, like those California "trophy cows".
